►► Single Stainless Steel Door TT1.1

Access door for buildings in the field of potable water supply and wastewater disposal with average security requirements.

The figure shown here may contain special accessories

Door, ready for installation, single door, double skinned, completely made from 1.4307 (AISI 304 L) stainless steel, with double rubber seal, the door and frame closing flush, the door opening to the outside (in escape direction).

Door leaf, skin: 1 mm, 55 mm thick, with injected CFCs-free polyurethane hard foam insulation, longitudinally ground surface finish, with rubber seal. Fastened to the frame with stable maintenance-free hinge plates. Mortise dead lock according to DIN 18251, class 3, with increased corrosion protection, stainless steel forend, provided for a customer-provided profile double cylinder (mechanical or digital), handle and cover of stainless steel.

Frame, three-sided, fabricated from special section, with inserted rubber seal, with selectable sill closure, including fixing material.

Frame and door shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Ordering options:

Frame:

- Z-frame
- Block frame

Mounting:

- Embedded
- Bolted with dowelling clips
- Bolted through the frame (not to affect the finished wall)

Door opening options:

- Hinges on left
- Hinges on right

Sill closure:

- With step flashing
- Without step flashing

Options:

- 1.4404 (AISI 316 L) stainless steel
- Panic lock
- Upper door closer, lockable in position
- One-part or two-part door arrestor
- Surface finish (lacquer with or without anti-graffiti properties, wooden panelling)
- Alarm system in door surface
- Magnetic contact: "door open" or "door closed" status display
- Lock-bolt contact: "locked" or "unlocked" status display
- Door heating (heating cable in frame and/or door surface), without temperature sensor, without controls
- Potential equalisation on frame
- Security ventilation louvres, openings to admit light
- Steel sheet finish for exterior door surface for installations exposed to sunlight

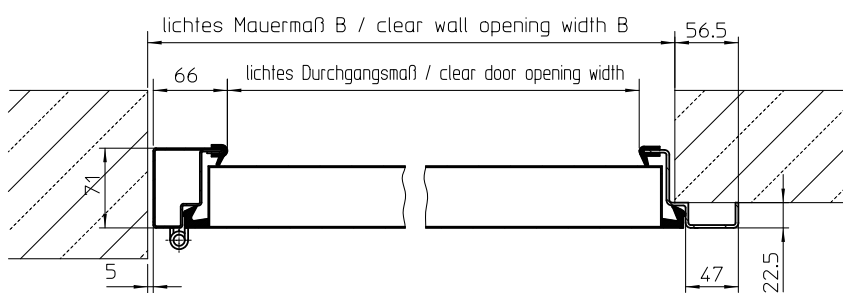

Note:

If the door is exposed to sunlight, its operability may be affected. In such a case, it is recommended to equip the door outside with a wood panelling or steel sheet.

Double Stainless Steel Door TT1.2

►► Single Security Door TT2.1/RC3

Access door for buildings in the field of potable water supply equipped with a burglar alarm system.

The figure shown here may contain special accessories

Security class RC3 is recommended by the criminal investigation department if the building is additionally secured by means of a burglar alarm system.

Security door, burglar and attack proof, certified to security of DIN EN 1627, resistance class RC3, ready for installation, single-leaf, double skinned, completely made from 1.4307 stainless steel (AISI 304 L), with double rubber seal, the door and frame closing flush, the door opening to the outside (in escape direction). Sound insulation: 34/29 dB.

Door leaf with injected CFCs-free polyurethane hard foam insulation, longitudinally ground surface finish, with rubber seal. Fastened to the frame with stable maintenance-free hinge plates. The closed door engaging flush with the frame by means of solid anchor bolts engaging in the frame for four-point locking. Galvanized safety lock with stainless steel forend, with austenitic manganese steel plate as anti-drilling protection, provided for a customer-provided mechanical profile half cylinder in accordance with DIN 18252:2006-12,21-,31-,71-BZ), with anti-panic lock, i.e. the door can any time be opened from inside by operating the handle, even when locked. Protective stainless steel fitting, without cylinder cover, with a rigidly mounted turning handle and a red plastic handle inside.

Frame, three-sided, fabricated from special section, with inserted rubber seal, with step flashing, including fixing material.

Frame and door shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Ordering options:

Frame / mounting:

- Z-frame – bolted with dowelling clips
- Block frame – bolted with dowelling clips
- Block frame – bolted through the frame

Door opening options:

- Hinges on left
- Hinges on right

Options:

- 1.4404 (AISI 316 L) stainless steel
- One/two security ventilation louvre(s) size 500 x 300 mm
- Provided for a customer-supplied digital profile cylinder with anti-panic function and pulling protection
- Upper door closer, lockable in position
- One-part or two-part door arrestor
- Lowerable floor seal
- Lockable from inside with a second handle
- Surface finish (lacquer with or without anti-graffiti properties, copper covering, wooden panelling)
- Alarm system in door surface
- Magnetic contact: "door open" or "door closed" status display
- Lock-bolt contact: "locked" or "unlocked" status display
- Door heating (heating cable in frame and/or door surface), without temperature sensor, without controls
- Lock for two side-by-side profile cylinders (that can be opened independently)
- Stainless steel rain protection rosette for the stainless steel profile cylinder
- Block frame insulation
- Potential equalisation on frame
- Steel sheet finish for exterior door surface for installations exposed to sunlight

Note:

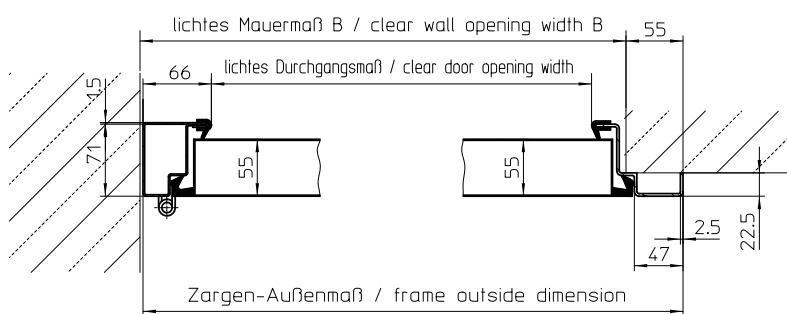

If the door is exposed to sunlight, its operability may be affected. In such a case, it is recommended to equip the door outside with a wood panelling or steel sheet.

Double Security Door TT2.2/RC4

➤➤ **Rigid Security Ventilating Louvre for external face of the wall TT2.JW Adjustable Louvre for internal face of the wall TT10.B**

The figure shown here may contain special accessories

Universally applicable for controlled ventilation of buildings, especially in the field of potable water supply, and for plants with increased security requirements.

A) Rigid safety louvre TT2.JW (for external face of the wall), attack proof, ready for installation, of rigid all welded construction, completely made from 1.4307 (AISI 304 L) stainless steel.

Frame, made from Z profile, 3 mm thick, designed for internal bolted fixing, with access to the anchors only from the interior wall surface.

Slats, 3 mm thick, rigidly welded, with the slats staggered so that penetration is impossible even with moveable hoses. With 1 x 1 mm fly screen on the inside.

Both frame and slats are shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Options:

- 1.4404 (AISI 316 L) stainless steel
- Lacquered on the outside
- Ground surface finish
- Additional internal frame with removable fine filter for dust and pollen, held by wing nuts
- Fixing material

The figure shown here may contain special accessories

B) Adjustable louvre TT10.B (for internal face of the wall), ready for installation, 1.4307 (AISI 304 L) stainless steel.

Frame, made from angle section with boreholes for bolted fixing.

Slats, adjustable, overlapping when closed, with chain pull lockable in any position.

Both frame and slats are shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Options:

- 1.4404 (AISI 316 L) stainless steel
- Fixing material

►► Single/Double Chlorine Room Door TT5

Access door for buildings in potable water supply where chlorine gas is stored or used.

The figure shown here may contain special accessories

Chlorine room door, ready for installation, single door, double skinned, completely made from 1.4404 (AISI 316 L) stainless steel, with double rubber seal, the door and frame closing flush, the door opening to the outside (in escape direction), in accordance with UVV and DVGW standards.

Door, skin: 1 mm, 55 mm thick, with injected CFCs-free polyurethane hard foam insulation, longitudinally ground surface finish, door inside lacquered in RAL 9006 (stainless steel look), with rubber seal. Fastened to the frame with stable maintenance-free hinge plates. Two aeration slits, W x H = 100 x 20 mm (one in top door section, one in bottom door section), with plastic insect screen.

Galvanized mortise dead lock with stainless steel forend provided for a customer-supplied profile double cylinder, with **anti-panic function**. Stainless steel door handle set, button outside, handle inside.

Frame, three-sided, fabricated from special section, with inserted rubber seal, with step flashing, including fixing material.

Frame and door shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Ordering options:

Frame:

- Z-frame
- Block frame

Mounting:

- Embedded
- Bolted with dowelling clips
- Bolted through the frame not to affect the finished wall

Door opening options:

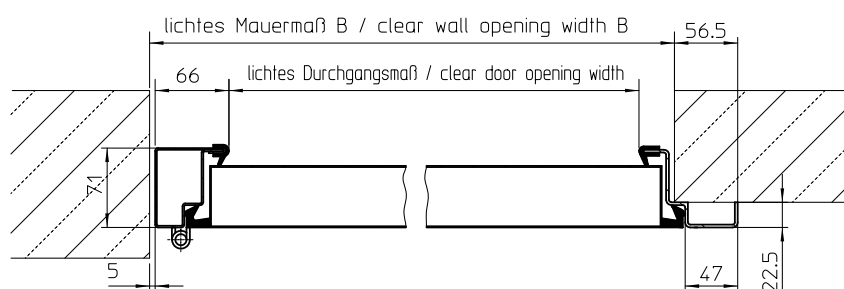

- Hinges on left
- Hinges on right

Options:

- Upper door closer, lockable in position
- One-part or two-part door arrestor
- Surface finish (lacquer with or without anti-graffiti properties, wooden panelling)
- Alarm system in door surface
- Magnetic contact: "door open" or "door closed" status display
- Lock-bolt contact: "locked" or "unlocked" status display
- Door heating (heating cable in frame and/or door surface), without temperature sensor, without controls
- Potential equalisation on frame
- Security ventilation louvres, openings to admit light
- Steel sheet finish for exterior door surface for installations exposed to sunlight

Note:

If the door is exposed to sunlight, its operability may be affected. In such a case, it is recommended to equip the door outside with a wood panelling or steel sheet.

We manufacture to your specifications. Please consider these definitions of measures:

Clear wall opening (F) = distance between bottom edge of lintel and top edge of unfinished floor

Clear height (H) = distance between bottom edge of lintel and top edge of finished floor

Drawing No. 190.166, 7.2023

Single/Double Chlorine Room Door TT5

►► Flood-Proof Single Exterior Door TT6

Access door for the field of potable water supply, especially in areas where flooding is likely.

The figure shown here may contain special accessories

Exterior door, flood-proof up to a water gauge of 2 m, opening to the outside (pressure side), ready for installation, double skinned, completely made from 1.4307 (AISI 304 L) stainless steel.

Door, 2 mm thick plate on the pressureless side, 4 mm thick plate on the pressure side. Door thickness: 58 mm, with injected CFCs-free polyurethane hard foam insulation. With circumferential square rubber seal. Fastened to the frame with stable maintenance-free hinges. Locking levers operable from both sides.

Frame, made of circumferential angle section, provided for bolted fixing on the pressure side, with associated fixing material and rubber seal between the frame and wall.

The wall must have a plane surface in the installation area, tolerance: ± 1 mm per metre, minimum required concrete strength class is C20/25; maximum permissible concrete strength class C50/60.

Door and frame shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Ordering options:

Door opening options:

- Hinges on left
- Hinges on right

Options:

- 1.4404 (AISI 316 L) stainless steel
- Designed as cascade door
- Cylinder lock for increased security (operable from the pressure side only)

nominal size Order number	Clear wall opening width B / height H	Clear door opening width /height
0830/1630	830 / 1630	800 / 1600
0830/1830	830 / 1830	800 / 1800
1030/2030	1030 / 2030	1000 / 2000

All measurements in mm. **Ask for further dimensions.**
Maximum clear wall opening B x H = 1030 x 2030 mm.

Flood-Proof Single Exterior Door TT6

►► Rectangular Pressure-Tight Door TT7 with Locking Levers

Access door for containers, especially in the field of potable water supply, pressure-tight up to a water gauge of 10 m.

The figure shown here may contain special accessories

Pressure-tight door, pressure-tight up to a water gauge of 10 m, opening to the pressure side, ready for installation, to be lined on both sides (wall thickness \geq 280 mm), rectangular, completely made from 1.4404 (AISI 316 L) stainless steel, statically certified.

Door, 5 mm thick, reinforced with U-shaped bent plate. Smooth door leaf on the pressure side. With circumferential square silicone seal, suitable for potable water, ozone resistant, certified to KTW and DVGW W 270 standards. Locking levers operable both from the door outside and, for safety reasons, also from the pressure side while the reservoir is empty. With stable maintenance-free hinge plates between the door and frame.

Frame, circumferential with one centre and two side gaskets, provided for embedding in concrete. Frame with lifting eyes.

Frame and door shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Note: Guarantee for tightness between the frame and concrete is only provided if the concrete structure is homogeneous all around the circumference. The minimum concrete quality and corresponding concrete classes are to be determined by the customer. In the case of frames for retrofitting, the manufacturer's specifications for the fixing material must be observed.

Ordering options:

Door opening options:

- Hinges on left
- Hinges on right

Options:

- Frame, for retrofitting, space required for the frame: 150 mm, circumferential. Prerequisite is a plane inner wall surface, tolerance: ± 1 mm per metre
- Pressure door for round tanks
- Centrally installed inspection window, inside diameter: 150 mm, with or without window wiper
- Installed LED underwater spotlight
- Installed cylinder lock (operable from one side)
- Locking by means of screw caps
- Pressure door with three-sided open-top frame for parapets, maximum water gauge = door height.
- Sanding of frame parts in contact with concrete
- Condensate drain on external door surface
- Doorstop with wedge
- Sampling valve on external door surface
- Partly submersible, lower part pressure-tight, upper part with an integrated inspection opening
- Provided for welding to the PE coating
- Potential equalisation on the frame
- Completely made of 1.4307 (AISI 304 L) stainless steel

Nominal size Order number	Clear wall opening width B / height H	Frame outside dimensions width / height	For wall thickness A
0800/1200	800 / 1200	1086 / 1486

Rectangular Pressure-Tight Door TT7.Z with Central
Lock Registered design no. 298 01 144.1

►► Rectangular Pressure-Tight Door TT7.30 with Central Lock

Access door for containers, especially in the field of potable water supply, pressure-tight up to a water gauge of 30 m.

The figure shown here may contain special accessories

Pressure-tight door, pressure-tight up to a water gauge of 30 m, opening to the pressure side, ready for installation, to be lined on both sides (wall thickness ≥ 300 mm), rectangular, completely made from 1.4404 (AISI 316 L) stainless steel, statically certified.

Door, curved convex design with frame reinforcements to ensure that the acting pressure forces can pass into the door frame via the circumferential frame. With circumferential special silicone seal, suitable for potable water, ozone resistant, certified to KTW and DVGW W 270 standards. Locking crank handles operable both from the door outside and, for safety reasons, also from the pressure side while the reservoir is empty.

Frame, circumferential with one centre and two side gaskets, provided for embedding in concrete. Frame with lifting eyes.

Frame and door shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

Note: Guarantee for tightness between the frame and concrete is only provided if the concrete structure is homogeneous all around the circumference. Round Pressure-Tight Door TT7.R
with Screw Locks

►► Round Access Cover TT8a with screwed joints

Maintenance opening, especially for the field of potable water supply, pressure-tight up to a water gauge of 5 m.

The figure shown here may contain special accessories

Access cover, pressure-tight up to a water gauge of 5 m, ready for installation, round, completely made from 1.4307 (AISI 304 L) stainless steel, with intermediate sealing suitable for the specific application, can be lined on both sides.

Blank cover with lock and two handles for easy operation, connected with the frame by means of screwed joints.

Frame, designed as F-piece with centrally welded wall flange, provided for embedding in concrete. Frame with lifting eyes.

Blank cover and frame shielded arc-welded and acid bath cleaned before washing, drying and surface passivation.

The figure shown here may contain special accessories

Options:

- 1.4404 (AISI 316 L) stainless steel
- Centrally installed inspection window, inside diameter: 150 mm, with or without window wiper
- Sanding of frame parts in contact with concrete
- Stable maintenance-free hinges screwed to the frame, can be lined on both sides. (Please indicate the door opening option.)

Application:

- Drinking water (KTW certified sealing)
- Wastewater (rubber seal SBR)
- Biogas (rubber seal EPDM E628 70 ± 5 Shore)

Mannloch - Standard Ausführung/
Access cover - standard version

Available with a clear opening of 600 mm or 800 mm

Mannloch - Sonder Ausführung mit Schamier/
Access cover - special version with hinge

Round Inspection Cover TT8b

➤➤ Rigid window F1, designed to prevent thermal conduction

The figure shown here may contain special accessories

Frame window, rigid, ready for installation, made from two-sheet special 1.4301 (AISI 304) stainless steel profile with intermediate special plastic core to prevent thermal conduction, thermally insulated according to EN 10077, $U_f = 2.70 \text{ W/(m}^2\text{*K)}$. Glazing bead invisibly fastened.

Frame, designed for dowelling into window soffit, including fixing material.

Machine ground **surface finish**.

Dry glazing with insulation glass, without KTW approval

Options:

- 1.4404 (AISI 316 L) stainless steel
- Secure to prevent forced access according to DIN EN 1627, RC3 (only possible with wet glazing)
- Special glazing (e.g. security glass)
- Multi-wing window
- Outside window sill made from stainless steel
- Water chamber window, with drain holes towards the dry side, wet glazing KTW approved
- Other designs available on request
